PERSONAL PROFILE

Software Engineering graduate from the University of Kelaniya with hands-on experience in backend, frontend, and IoT development. Contributed to the AutoSecOps research project on **AI-driven** DevSecOps security and interned at **WSO2's Cloud Security Operations Center**. Skilled in DevOps, cybersecurity, and Generative **AI**, with a passion for building secure, scalable, and innovative software solutions.

EXPERIENCE

IfinityGlobal (NCINGA)

Nov 2025 – Present

Software Engineer

- Engineered backend services, REST APIs, and microservices-based solutions for enterprise banking and cloud integration platforms, improving system scalability.
- Spearheaded R&D on AI-driven solutions including autonomous AI agents, Retrieval-Augmented Generation (RAG), and intelligent workflow automation.
- Developed automation scripts and robust data pipelines to streamline secure communication between banking systems, APIs, and cloud platforms.
- Collaborated with cross-functional teams to analyze technical requirements, troubleshoot production issues, and deliver highly available enterprise solutions.

WSO2 – Cloud Security Operations Center

Oct 2024 – Apr 2025

R&D Software Engineer Intern

- Conducted R&D on phishing detection and first-response automation utilizing Python, Ballerina, ServiceNow, MongoDB, Docker, and cloud-native services.
- Participated in Agile ceremonies including daily standups, sprint planning, retrospectives, and comprehensive peer code reviews.
- Deployed microservices on Choreo; executed root cause analysis, incident correction, and implemented automated security workflows.
- Skills: Agile Practices, Code Reviews, Root Cause Analysis, Work Breakdown & Estimation, Technical Documentation, Incident Management.

Crytec Labs

Apr 2024 – Aug 2024

Software Developer (Backend & Mobile)

- Architected and developed backend modules and secure REST APIs using NestJS, while supporting cross-platform mobile application development with Flutter.

EDUCATION

University of Kelaniya, Sri Lanka

July 2022 – Jan 2026

B.Sc. (Hons) in Software Engineering

Completed: January 2026

- Key Coursework:** Problem Solving, Databases, Object-Oriented Programming, Data Structures and Algorithms, Full-Stack Web Development, DevOps, IoT

Sri Palee College, Horana

2017 – 2020

G.C.E. Advanced Level – Physical Science

- Combined Mathematics – A, Physics – B, Chemistry – B; Z-score: 1.6

SKILLS

- Languages:** Python, JavaScript / TypeScript, Rust, Java, SQL, Go, Ballerina, KQL, Dart, C, C++, C#, PHP
- Frameworks & Libraries:** NestJS, FastAPI, Flask, Flutter, Node.js, Angular, Spring Boot, React, React Native, Express, Next.js, Nuxt.js, .NET
- Databases:** MySQL, MongoDB, Firebase Firestore, MariaDB, Pinecone
- Mobile Development:** Flutter (Android & iOS), React Native, Dart, Cross-platform App Development

- **Cloud & Infrastructure:** AWS, Azure, GCP, Kubernetes, Docker, Terraform, Ansible, Choreo, Nginx, ServiceNow
- **DevOps & Monitoring:** Git, GitHub Actions, Argo CD, Jenkins, Grafana, Prometheus, n8n
- **Messaging, Integration & Security:** Apache Kafka, RabbitMQ, Eureka, Circuit Breaker patterns, Keycloak, Microservices architecture, WSO2 API Manager (APIM), WSO2 Micro Integrator (MI), WSO2 Identity Server (IS)
- **AI/ML & Emerging Tech:** Generative AI, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), YOLOv11, MLOps, Scikit-learn, PyTorch, TensorFlow, MLflow, DVC, CrewAI, MCP
- **Web3 & Blockchain:** Solana
- **Scripting & Automation:** Shell, Cron Jobs, Automation workflows
- **Tools & IDEs:** Postman, Jira, LaTeX, VS Code, IntelliJ IDEA, Android Studio, Arduino IDE
- **Platforms & Hardware:** Windows, Linux, Arduino, ESP8266, Raspberry Pi, Blynk
- **Soft Skills:** Problem Solving, Critical Thinking, Teamwork, Communication, Continuous Learning

PROJECTS

Tradesteam Full-Stack Platform (Real Client - India)	2026
• Architected the system design and built scalable backend microservices for financial business logic and high-performance data processing using Python, FastAPI, MongoDB, and Docker. • Developed a responsive frontend using React, seamlessly integrating RESTful APIs to deliver an intuitive user experience for real-time financial operations.	
Spring Microservices Complete Blueprint	2024
• Developed enterprise-grade microservices with service discovery, API Gateway, secure inter-service communication, and monitoring using Spring Boot, Kafka, Keycloak, Docker, Grafana, and Prometheus.	
RAG-Based Knowledge Management System	2025
• Built a Retrieval-Augmented Generation (RAG) platform for intelligent knowledge management using Python, Flask, OpenAI API, Pinecone, and LLM-based semantic search.	
University Z-Score Analysis System	2025
• Developed a predictive analytics platform for university course recommendations using FastAPI, Angular NX, AWS, Docker, Nginx, CI/CD, and GitHub Actions.	
Hospital Management System Backend (Real Client)	2024
• Developed and deployed a secure backend system for managing patient records and hospital workflows using the MERN Stack, Docker, AWS, and CI/CD pipelines.	
IoT Agriculture Monitoring System (Real Client)	2023
• Built a smart irrigation and monitoring system with real-time mobile control using C++, ESP8266, and the Blynk IoT platform.	

CERTIFICATIONS

- AWS Educate – Cloud 101, Compute, Storage, Databases, Networking (Issued 2025)
- Oracle Cloud Infrastructure 2025: Foundations Associate (1Z0-1085-25) & For AWS Architects
- Simplilearn– Getting Started with Ansible (Issued 2025)
- Microsoft Azure Fundamentals – Cloud Concepts, Service Types, Management & Governance, Cost Management, Monitoring Tools, Security Controls and Ansible (Issued Jun 2025)
- WSO2 API Manager (APIM), Micro Integrator (MI) & Identity Server (IS) Practitioner
